# HASAN AHMAD

## UX/UI DESIGNER

hasantanveerahmad@gmail.com · (513) 515-6687 · https://haasportfolio.com

## SUMMARY

Designs intuitive interfaces for complex, multi-path enterprise flows, from conditional branches and edge cases to error and recovery states, through engineering handoff and design QA. Redesigned multi-step B2B workflows on the LYCRA ONE portal, cutting task time up to 42%.

## EXPERIENCE

### THE LYCRA COMPANY

**UX/UI Designer** Oct 2023 – Dec 2025

- Cut task completion time 42% and earned 88% positive user feedback on Order Hang Tags, an enterprise ordering flow, by mapping every conditional path and designing complete empty, loading, error, and recovery states.
- Reduced task time 25% on Test & Approve a Fabric, a multi-step approval workflow, by auditing the existing flow, removing redundant steps, and validating the new paths through usability testing.
- Shipped both redesigns to production by writing engineering-ready specs, redlines, and interaction documentation, then running design QA through launch alongside product management and engineering.
- Scaled the Figma design system across 4 company sites by governing components, extending patterns responsibly for new flows, and documenting accessibility (WCAG) standards.

**Junior UX/UI Designer** Jan 2023 – Oct 2023

- Accelerated roadmap delivery by producing rapid prototypes for early-stage features and maintaining design-system documentation for the web development team.

### INDEPENDENT

**Freelance UX/UI Designer** Jan 2022 – Dec 2022

- **Increased site engagement 30%** in 6 months for a Cincinnati allergy and asthma clinic by restructuring its information architecture and redesigning the patient contact flow for responsive web and mobile.

**AI-BUILT PORTFOLIO** · Self-directed 2026

- Designed a mobile/desktop responsive portfolio site using AI-to-code workflow: layouts generated and refined in Claude Design, exported as production HTML, and deployed to GitHub Pages.

## SKILLS

| | |
|---|---|
| **Design** | UI and interaction design, multi-path flows, edge-case and error states, design systems, redlines, engineering handoff, design QA, accessibility (WCAG), responsive web |
| **Research** | User research, usability testing, interviews, A/B testing, prototyping, UX writing |
| **Tools** | Figma, FigJam, Framer, Jira, Slack, Miro, AI prototyping (LLMs) |

## EDUCATION

**Master's, User Experience Design** · Maryland Institute College of Art (MICA)

**Bachelor's, Industrial Design** · University of Cincinnati (DAAP)

Five co-ops over two years: Vorbeck Materials, Ethicon (J&J), University of Toronto, Nottingham Spirk
